Verified First

Experience the most innovative way to connect your HR solutions.

Introducing: The Verified First Browser Extension.

Integrations suck—they're overly complicated, costly, and, take way too long to implement.

We thought, there has to be a better way to deliver background screening. One that's faster, more intuitive, just as secure, and isn't a headache to implement. **Enter: our Browser Extension**.

The Verified First browser extension offers a seamless way to connect your HR platforms with our screening solution, robust enough to look like an API integration.

> **"There are no complicated configurations, no delays waiting for someone to activate something. It's as simple as downloading something from an app store."**
>
> - Jen Meyers, SwipeClock

With the click of a button, you can download our browser extension and place an order on virtually any webpage in a matter of minutes.
