

Mark Eisinger | Business Administrator

“We have the ultimate confidence in the APS system. The system has never been down: we’ve never encountered a situation in which we couldn’t run reports. Once you set up an employee in the system, there is really nothing else to do unless you have a change.”

Bill McKellar | CPA

“The APS Payroll System features are simple to use from the login to the time clock to the reports. Direct Deposit also saves time for both our company and our employees, which is a critical factor in health care with growing service demands.”

Vicki Barnes | PHR

“APS provides a parallel to our level of technology with a payroll system that I can access on my smartphone. I can receive a call or text with a question, access the system, and respond in less than three minutes from any location ... **We saved over \$200,000 the first year by making the switch to APS.** With the old system, we were paying more to get less.”

Ashley Burns | Bookkeeper

“APS Payroll helped solve my problem of each of our locations having to do their own payroll. I can upload directly from the POS and review everything in one system. Customer service also makes a huge difference. I love that I can email or call anytime and get help, even when it’s a tiny issue.”

Chris Horne | Director of Finance

“With the large payroll company we used before, we were a little fish in a big sea of customers. Whenever we had a problem or a question, we had to re-explain our scenario every time and we never felt important. **With APS, they recognize our voice when we call; they care about our mission, and the personal care we have consistently received has been exceptional.**”

Keli Greenberg | Executive Director of Human Resources

“It was critical for us to identify a company which could handle the intricacies of our detailed payroll structure and provide a solution robust enough to provide the high performance we demand without being overly complicated. Many of the payroll companies we looked at had more of a ‘department store’ approach to customer service instead of the **highly responsive ‘boutique’ level of personalized service and relationship-building culture we experienced with APS.**”
