

Sandy Wright | Accounting/IT

"Customer service is fabulous. I always get quick responses to my questions. Their system is very easy to use and I have quick access to the reports that I use the most."

Zettie Robinson | Payroll Manager

"APS eliminates the company's payroll tax liability and has wonderful one-on-one customer service. It has safety nets during the payroll process that make mistakes virtually impossible."

Danielle Shih | Accounting Manager

"It's nice to work with a payroll company that works hard to accommodate the specific needs of its clients instead of expecting them to fit into one generic mold. The transition to APS was so seamless that our employees didn't even know we made a change until we introduced them to the new employee self service site."

Wanda Bucciarelli | HR Manager

"I used APS at my previous company and brought them on board with my current employer. They have great customer service and I like how user-friendly the APS product is."

Maggie Reed | Human Resources

"APS is user-friendly for the employees and management. Payroll is completed quickly without the hassle of in-house duties. Payroll can be very complicated, with APS' involvement I feel at ease knowing all unemployment taxes are being done correctly."
